Subject: Fever following GI endoscopy investigation

Centers for Disease Control and Prevention (CDC) is investigating reports of non-respiratory febrile reactions beginning a few hours after gastrointestinal endoscopy procedures. Cases have occurred since June 19, 2009. We are interested in hearing from others who might have seen clusters of similar cases. If you have seen a recent cluster of these cases, please contact Arjun Srinivasan (asrinivasan@cdc.gov) at CDC.
