

## **SURVEILLANCE AND APPLIED EPIDEMIOLOGY INTEREST GROUP**

The group had a setback in activities during 2009 due to members' increased workloads in dealing with Pandemic H1N1. The group did meet at the 2009 National Education Conference. The group has begun work on a survey for CHICA-Canada infection control professionals, to determine their needs for surveillance tools and education. This should be completed by spring 2010. We are also in preliminary discussions for planning a surveillance and epidemiology day at the 2011 CHICA-Canada conference.
